## Case Study – Adnoc New Headquarters

**Project:** ADNOC Headquarters  
**Location:** Abu Dhabi, UAE  
**Contact:** Besix  
**Consultant:** Meinhart  
**Area of Installation:** 55.000 sqm granite

## Case Study – Adnoc New Headquarters

- 320 kg stone panels fixed on blind façade at a height of 285 meters
- Wind load values taken from Wind Tunnel Test Reports were 3000 N/m<sup>2</sup> for pressure and 3500 N/m<sup>2</sup> for suction
- Special considerations were taken in the fixing design and methodology of the stone on account of these high loads
